Psychology Test Outline Assignment

This includes the Scientific Method, Ethics, Conditioning, as well as anything that we have gone over, period.

So, we have gone over a lot of information, and you have a test tomorrow. Therefore, we are going to try working on some studying in here so that way you have to do less, notice I did not say “no,” studying at home.

First of All, all the PowerPoints should now be uploaded on to my website. I want you to go through and create a solid outline of all information we have gone over from day in this class. You’re probably looking at a full front and back page to say the least.

After this is done.

I WILL LET YOU KNOW WHEN TO TALK TO YOUR PARTNERS

Swap with your partner and see where you each might have over looked something.

YOU WILL SPEND A FEW MINUTES COMPARING

Now, create a single outline together from the two of yours.

This should be pretty inclusive of all information we have gone over.

Make sure each of you have at least 5 major points that you think everyone in the class will need to know.

Make sure each point is backed up by two sentences explaining why it is important.
